

Intent

PE

At Burnt Tree Primary, we recognise the importance of physical education and the role it has to play in promoting active and healthy lifestyles. Our PE curriculum provides all children with high quality provision and a wide range of opportunities both in and out of school so that children will become passionate about sport and continue to become honest, determined members of our school team. We strive to inspire our pupils through exciting and stimulating PE lessons that are enjoyable and accessible to all. Through our teaching of PE, we aim to give all children the chance to participate in competitions in both school and the local area. Children will grow in self-belief, whilst displaying high levels of respect and sportsmanship when working as a team.

Implementation

From EYFS to KS2 we provide a weekly PE programme, which incorporates a range of sports and skills building on children's abilities as well as developing resilience and confidence. We provide a range of extra-curricular activities to motivate and inspire children by giving them further opportunities to experience new sports, as well as those that they are passionate about. Through our inclusive approach, children will be encouraged to understand the importance of not only physical development, but also the impact that PE has on their own well-being. Children participate in workshops with professional athletes which give them aspirations for the future and develops their self-belief.

Impact

Through the good quality teaching we provide children are knowledgeable on how to lead a healthy and active lifestyle. Children will take ownership and responsibility of their own health and fitness. Children's sporting achievements are celebrated in assemblies as well as when attending competitions against other schools in the local area. Children will leave Burnt Tree Primary with the necessary skills and love for sport. They will grow up to live happy and healthy lives, utilising the skills and knowledge acquired through PE.
